- **TLRA** Taiwan Leprosy Relief Association Taiwan

FOREWORD

This report is a summary of ILEP Member-Associations support to leprosy work in 2003. It occurs at project, country and federation levels, and includes both financial and analytical data.

Source of information

All financial information comes from the ILEP Co-ordinate Expenditure 2003 and previous years.

Patients' data from ILEP supported projects come from the different ILEP B Questionnaires, examples of which can be found at the end of this report. When data is not available from ILEP supported projects, other sources may be used such as Government or the World Health Organisation (WHO) Figures. If such a situation occurs, reference is clearly made in the report.

Questionnaires are received from ILEP Members, either as hard copy or through e-mail. Members are responsible for checking the accuracy of data coming from the field. Every effort is made in our office to avoid data-entry error. However some errors may still occur. Please inform us should you notice any mistake.

Accuracy of data

ILEP Members support anti-leprosy work at various levels. In some cases, Members work in partnership with the national programmes at country level and in other cases support is through local partners in specific regions or small private projects. When support is at national level, the figures reported through the ILEP reporting system will be the same (or very similar) to the government's figures. In countries where Members are only supporting certain regions or a few projects, the data may not represent the total situation with regards to leprosy in that country.

When considering the trends over several years it is important to remember that the number of projects, and even of countries, for which a report is available varies from one year to another. This factor is not negligible and can affect data comparison by year. This is especially true of the ILEP population figure, which is used to calculate the various rates. This figure is the combined population of all supported projects.

This year the new *Patient Data* questionnaire was used in 58 projects mainly from Indonesia and Vietnam. Data items not collected on this questionnaire will therefore only be partially represented in the report. This is particularly noticeable with the data on the number of registered cases and the associated prevalence rate.

Our computer programme can deal with data overlap provided we are aware of the existence of such a situation. Please note that the tables D to F in section 5 contain data that may overlap. For this reason, country totals are not included in these tables. Totals may be found in the country tables, section 4 tables A to C, which do not include the duplicated data.

Availability of information

This document, as well as the complete project profiles and all ILEP questionnaires, can be downloaded from the ILEP web site: www.ilep.org.uk

We will be happy to receive your comments and reactions to this annual report. Please do not hesitate to contact us by email: ilep@ilep.org.uk.

TOTAL	56 544 431	3 058 612	1 948 757	61 551 800

(1) including other scientific activities such as congresses and journals.

(2) Including support to training, consultancies and patients' associations.

Graph 1: Distribution of ILEP Members' field support by region

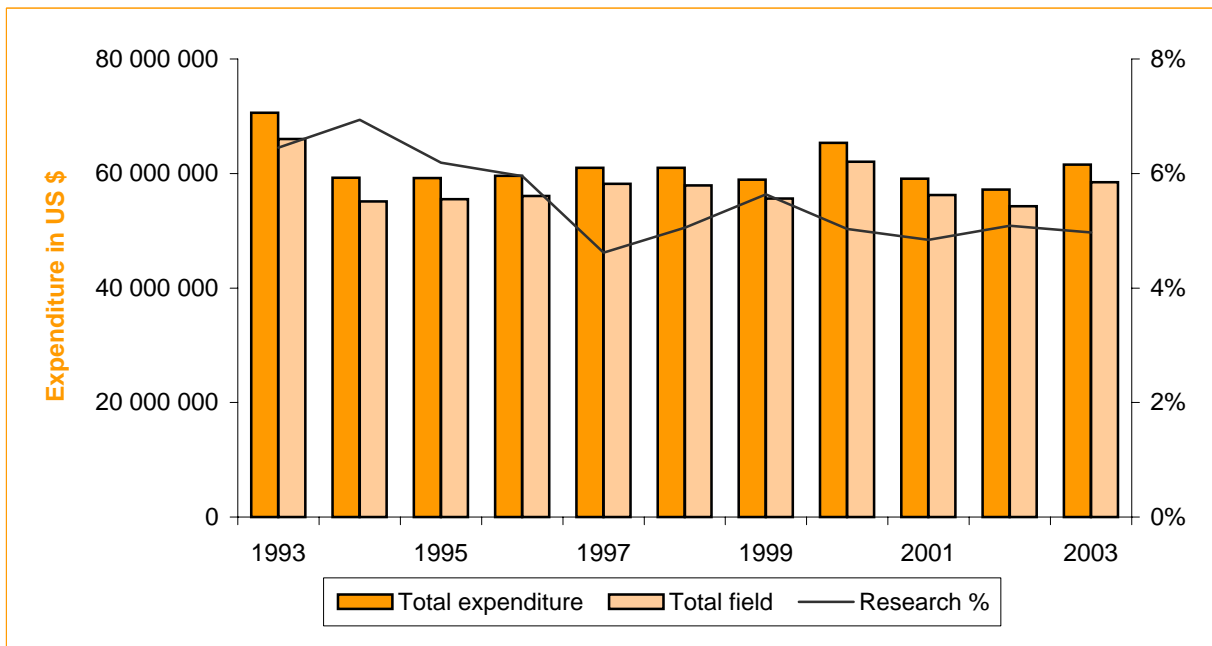

1.2 EVOLUTION OF ILEP MEMBERS' SUPPORT 1993-2003

Table 2: Details of support of ILEP Members (in US \$)

Year	Field related expenditure	Research support	Total Expenditure	% Research
1993	66 037 765	4 554 373	70 592 138	6.5%
1994	55 126 596	4 109 765	59 236 361	6.9%
1995	55 514 077	3 662 499	59 176 576	6.2%
1996	56 046 899	3 547 333	59 594 232	6.0%
1997	58 182 653	2 815 039	60 997 692	4.6%
1998	57 908 015	3 081 357	60 989 372	5.1%
1999	55 617 243	3 320 139	58 937 382	5.6%
2000	62 052 753	3 287 678	65 340 431	5.0%
2001	56 212 750	2 861 247	59 073 997	4.8%
2002	54 286 431	2 910 729	57 197 160	5.1%
2003	58 493 188	3 058 612	61 551 800	5.0%
Total	635 478 370	37 208 771	672 687 141	5.5%

In 2003, there was a slight increase in the total ILEP Co-ordinate Expenditure compared with the previous year. Research support also increased, but remains around 5% of the total support.

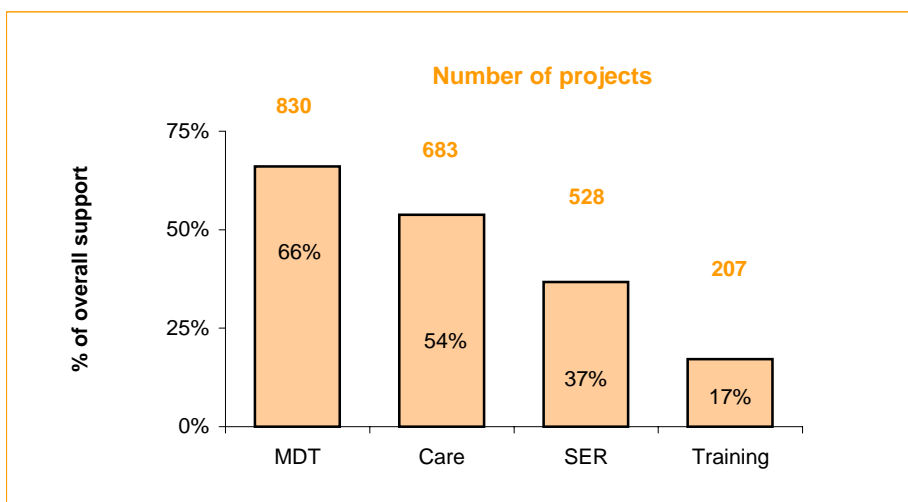

Graph 2: Trend of ILEP Members' support

1.3 BREAKDOWN OF 2003 SUPPORT BY TYPE OF ACTIVITIES

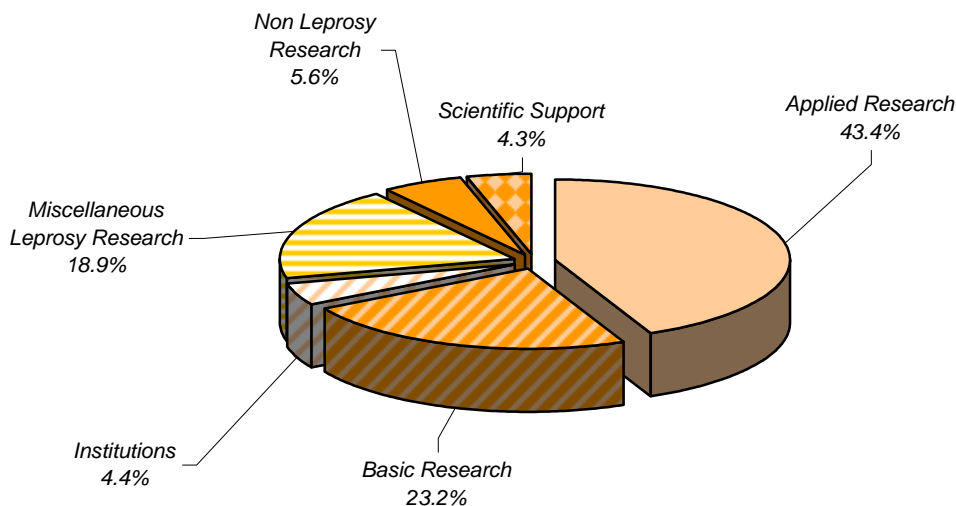

Graph 3: ILEP Members' support to field activities

The ILEP information system does not currently allow us to give an accurate breakdown of Members' support allocated to field projects by type of activities. Some projects may undertake various activities. The graph below shows, for each type of activity, the number of projects supported and the percentage of the overall field support it represents. For instance, 207 projects financed by ILEP Members in 2003 reported a training component, these same projects received 17 % of the overall field expenditure.

A total of 1051 field projects were supported by ILEP Members in 2003, representing a total amount of 56 544 431 US\$.

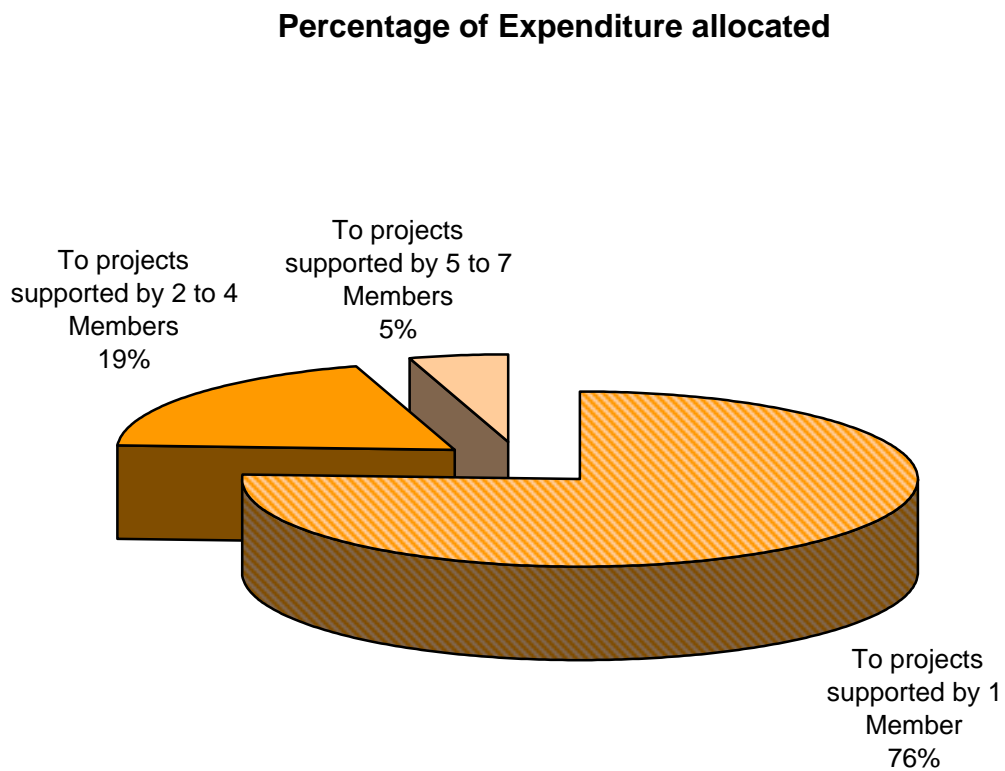

Graph 4: ILEP Members' support to research activities

Research categories	No. of projects	Grants in US\$
Applied Research	18	1 328 791
Basic Research	14	709 525
Institutions	7	136 242
Miscellaneous Leprosy Research	3	578 326
Non Leprosy Research	5	172 940
Scientific Support	5	132 788
Total	52	3 058 612

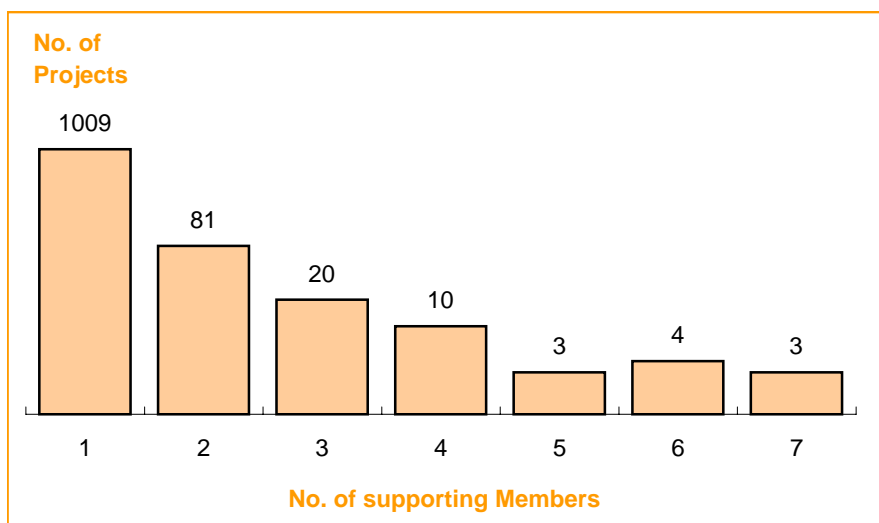

1.4 CO-FINANCING WITHIN THE FEDERATION IN 2003

Graph 5: Proportion of Federation expenditure according to the number of Members giving support.

Co-funding remains an important aspect of the Federation. A quarter of the ILEP Co-ordinate Expenditure represents funds used to support projects jointly with other Member associations.

Graph 6: Number of projects according to number of Members giving support

Out of the 1 130 projects financed by ILEP Members in 2003, 9% were supported by 2 or 3 Members whilst 89% remain financed by one Member only.

2. MDT AND PREVENTION OF DISABILITIES

2.1 ILEP SUPPORTED PROJECTS KEY DATA FOR 2003

A total of 600 reports were used to produce the statistics of this section. 599 field projects submitted an ILEP B1 Questionnaire. In addition, WHO National Programmes figures were used for the Central African Republic.

ILEP Members' support took place in 85 countries, representing a total coverage of 2 164 332 392 (1)

Table 3: ILEP global indicators 2003

Detection	
• Total number of newly detected cases during 2003	404 449
% MB on all new cases	46.6%
• Total number of children among the newly detected cases	45 657
% children on all new cases	11.3%
• New cases with disability assessment at detection	326 071
% new cases with disability assessment on all new cases	80.6%
• New cases with disability 2 amongst all those assessed	18 359
% on all new cases assessed	5.6%
% on all new cases	4.5%
MDT Completion	
• PB Patients having completed MDT as prescribed	179 280
completion rate PB	80.2%
• MB Patients having completed MDT as prescribed	161 822
completion rate MB	76.6%
Prevalence	
• Total number of patients registered for treatment at year end (2)	332 750

(1) ILEP population coverage is obtained by adding together the coverage of the individual projects (including any WHO data).

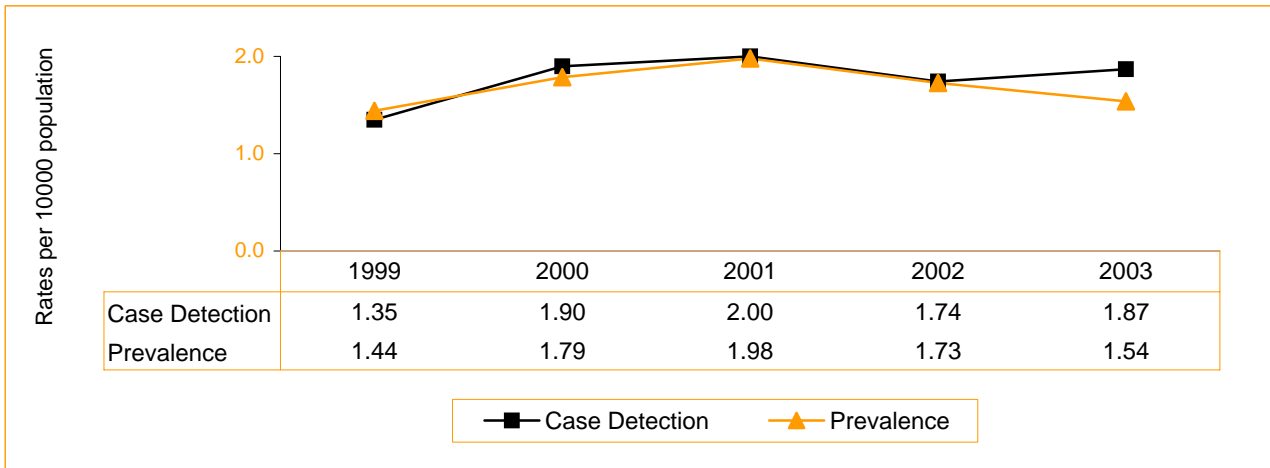

(2) For those projects reporting on the new Questionnaire B Patient data, no data for registered cases is included. Only partial data is, therefore, available for this indicator.

Graph 7: Case detection and prevalence rate (1999-2003)

The three following graphs show the prevalence and case detection rates in ILEP supported projects. The graphs show the rates in all the projects, in all projects excluding India and in India only. As India alone represents 65% of the newly detected cases, the data of that country influence dramatically global figures. It is thus important to analyse data coming from India separately.

Case detection and prevalence of cases registered for treatment have more or less remained unchanged compared to the previous year.

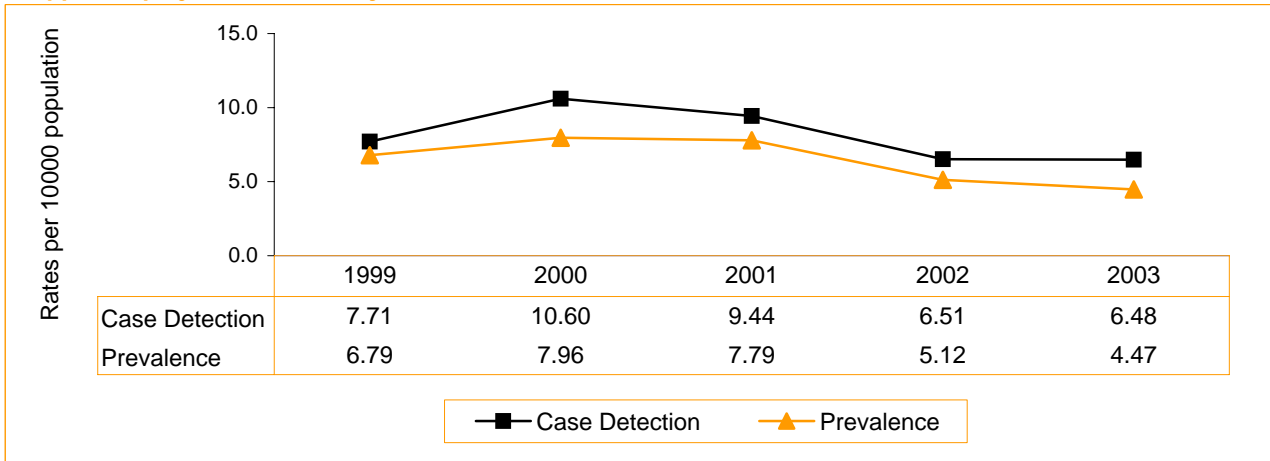

All ILEP supported projects

All ILEP supported projects excluding India

Supported projects in India only

Case detection data is stable over the last two years. This can be explained by decreased active case finding activities as compared to previous years. The apparent decline in prevalence can be explained by the introduction of a new questionnaire and therefore only partial reporting of this indicator. In India the case detection rate is higher than prevalence. This can be explained by the relatively lower proportion of MB cases and the relatively shorter duration of treatment.

2.2 ILEP WITHIN THE OVERALL CONTEXT OF LEPROSY

Table 4: Comparison of World and ILEP Figures for Top 40 countries.

The countries selected below are the Top 40 countries in terms of number of newly detected cases in ILEP supported projects. WHO figures are taken from the WHO Website www.who.int as on 29 September 2004. These were the most recent WHO figures available at the time of printing.

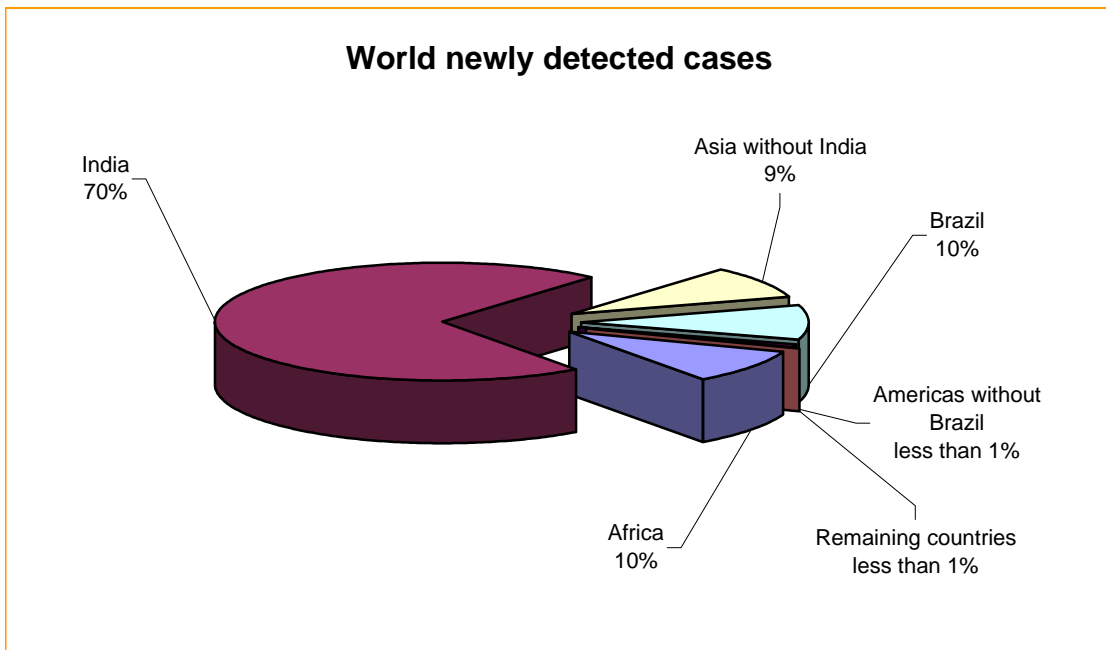

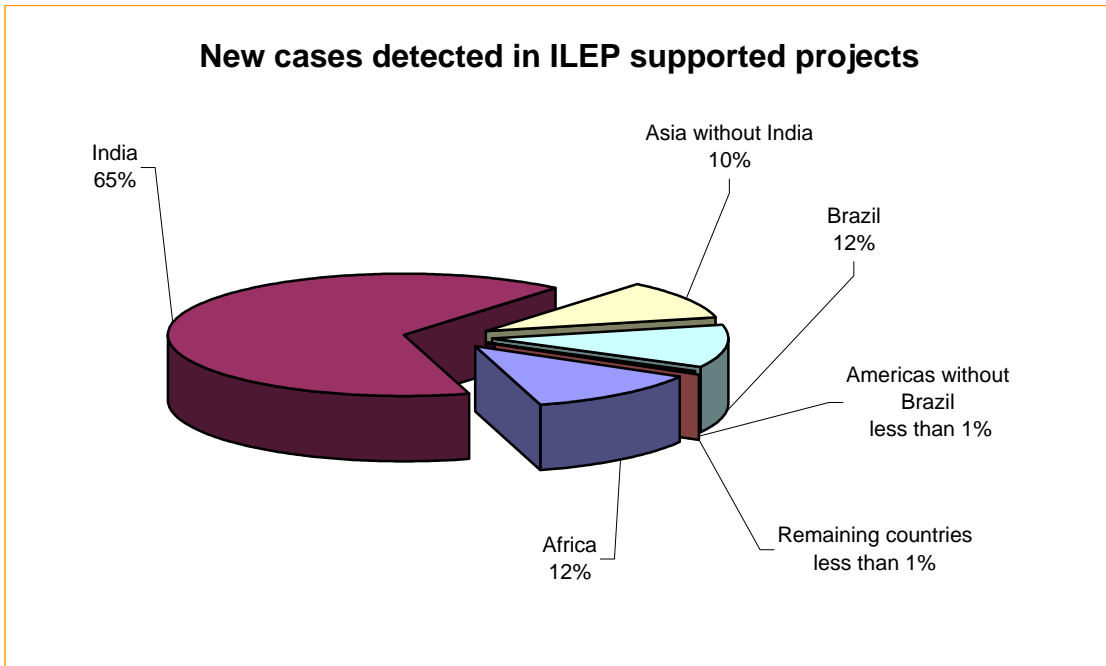

ILEP supported projects 2003		Global Leprosy situation		Country	ILEP supported projects 2003		Global Leprosy situation		
Case-detection		Case-detection			Case-detection		Case-detection		
All new detected	Rate per 10 000	Cases detected in 2003	Rate per 10 000		All new detected	Rate per 10 000	Cases detected in 2003	Rate per 10 000	
India	264 723	6.5	367 143	3.6	Burkina Faso	843	0.7	843	0.7
Brazil	46 643	2.9	49 206	2.9	Ghana	820	0.4	180	0.1
Indonesia	15 342	0.8	14 641	0.7	Pakistan	754	0.1	751	0.1

Vietnam	920	0.2	949	0.1	Others	2 185		3 715	
					ILEP/WORLD	404 449	1.87	512 798	

(3) WHO National Programmes figures were used for Central Africa Republic as no ILEP data were available.

There may be some discrepancy between WHO and ILEP data in some countries. It may happen that prevalence or detection data given by ILEP are higher than those reported by WHO. This seems illogical, since WHO data are for whole countries. The explanation for these discrepancies is not always evident, nor which figure is reliable. The ILEP Secretariat tries to avoid duplicate data but these may, however, not always be excluded. In some cases, different population figures are used, leading to differences in the rates. The population used for the calculation of ILEP rates in ILEP supported projects is obtained by adding together the populations of all the projects within the countries. WHO uses the whole population of the country.

ILEP supported projects often cover specific areas where leprosy is highly endemic; thus detection rates maybe are higher in these projects. In ILEP supported projects, 13 countries have a case detection rate at or above 1.0 per 10 000.

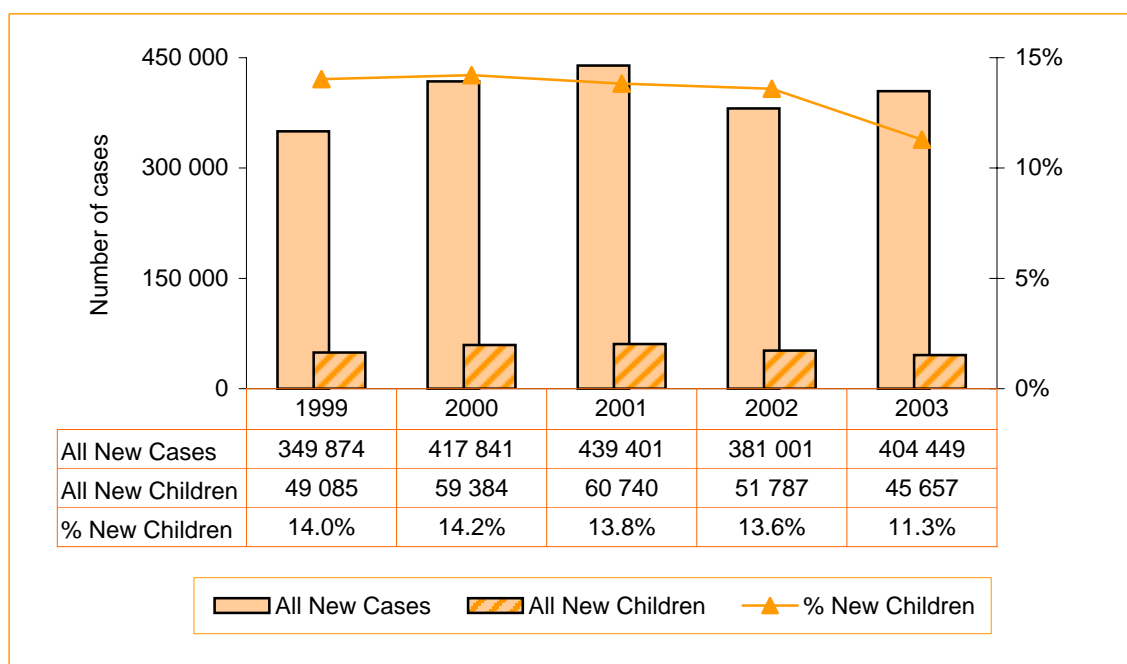

Graph 8: Distribution of newly detected cases in 2003 by region

The geographical distribution of the newly detected cases in ILEP supported projects is different from the global figures. Although almost two-thirds of the newly detected patients in ILEP supported projects live in India, the contribution of ILEP to case detection is relatively less significant in India than in the other parts of the world.

2.3 NEW CASES DETECTED IN ILEP SUPPORTED PROJECTS

Graph 9: Children among newly detected cases (1999-2003)

The proportion of children has dropped mainly because of the impact of reduced active case finding activities in India and possibly of improved diagnostic accuracy. However, the proportion is still high and denotes a continued active transmission of the disease.

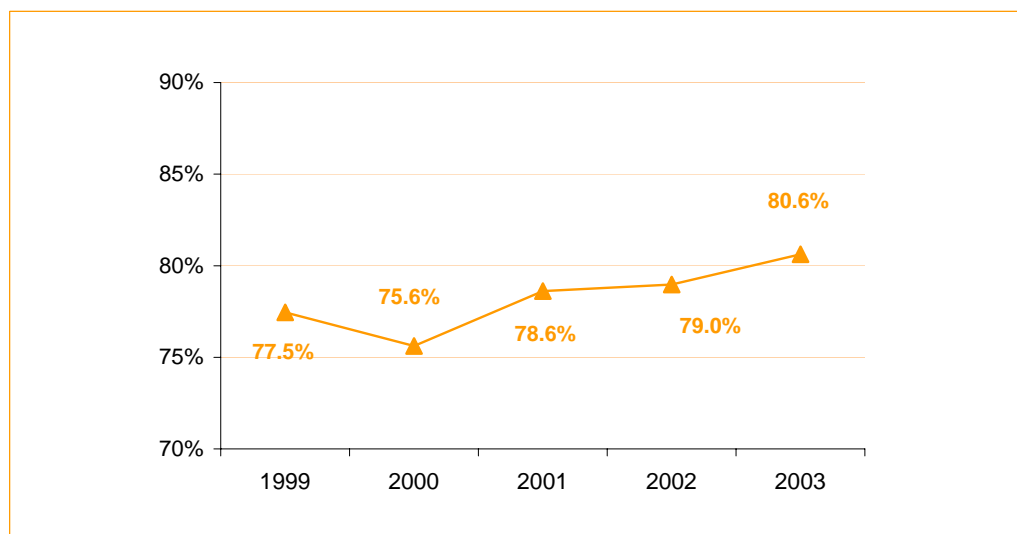

Table 5: Details of newly detected cases in key countries in 2003

Country	New cases	% of MB cases	% of children	Share of new cases (%)
India	264 723	39.3%	12.5%	65.5%
Brazil	46 643	50.3%	8.5%	11.5%
Indonesia	15 342	76.8%	10.5%	3.8%
Bangladesh	7 182	33.5%	9.8%	1.8%
D.R of Congo	6 957	54.3%	13.1%	1.7%
Nepal	6 479	51.1%	6.4%	1.6%
Mozambique	5 907	63.2%	10.4%	1.5%
Tanzania	5 467	66.7%	8.5%	1.4%
Madagascar	5 231	66.7%	14.6%	1.3%
Ethiopia	5 216	88.1%	5.6%	1.3%
Nigeria	4 471	87.5%	8.7%	1.1%
Myanmar	4 151	51.9%	7.2%	1.0%
Angola	2 933	68.5%	10.8%	0.7%
Total	380 702	42.6	10.8	94.1%

Thirteen countries account for more than 95% of the new cases detected in ILEP supported projects.

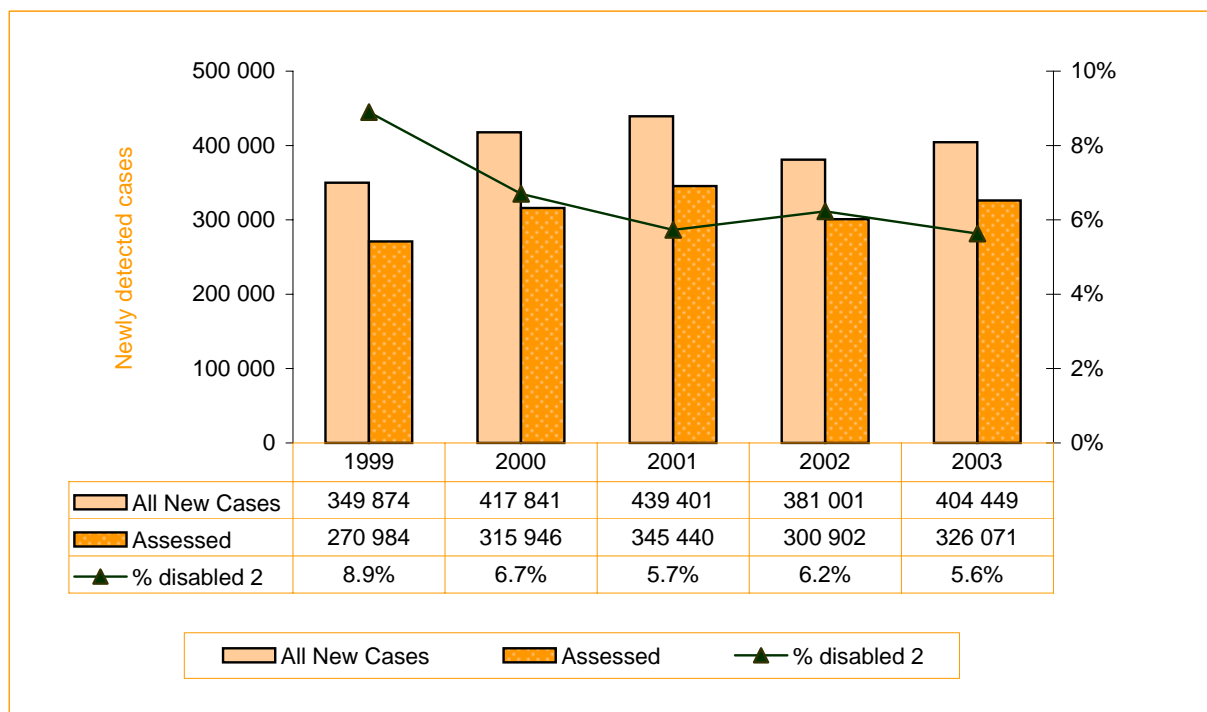

2.4 DISABILITY ASSESSMENT IN ILEP PROJECTS (1999-2003)

Graph 10: % of newly detected cases with disability assessment

There is an improvement in the number of new cases reported as receiving a disability assessment at detection, but the target of 90 % assessment is not reached yet.

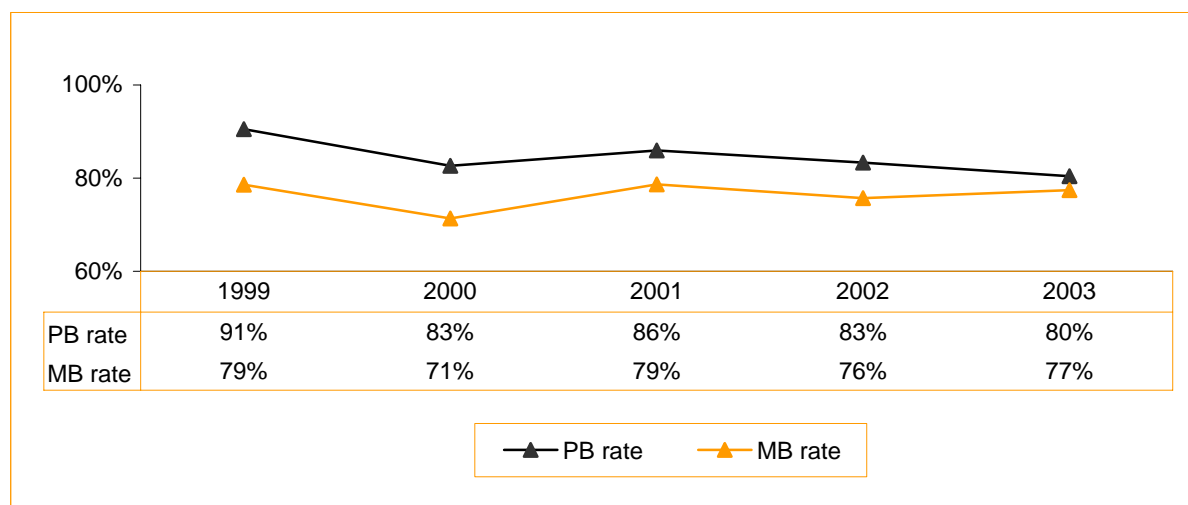

Graph 11: Newly detected cases with WHO grade 2 disability

The proportion of new patients with disability grade 2 remains stable since 2000. It is, however, known that the quality of disability assessment and reporting is not adequate in many programmes.

2.5 MDT COMPLETION IN ILEP SUPPORTED PROJECTS

Graph 12: Trend in MDT completion rates (1999-2003)

The data from Madagascar and Myanmar is not consistent over the period in question and have, therefore been removed from the above graph. For the remaining countries the rates remain at a similar level to previous years.

Table 6: MDT completion in key countries in 2003

Country	Started PB	PB completion rate (%)	Started MB	MB completion rate (%)
India	166 362	81.3	144 378	78.6
Brazil	21 569	69.5	21 532	62.6
Indonesia	9 806	81.6	510	90.4
Bangladesh	5 662	90.5	2 572	86.2
Myanmar	2 056	62.4	2 318	N/A
Tanzania	2 851	92.0	3 676	80.6
Nepal	2 079	66.4	3 793	64.6
Mozambique	1 903	86.2	3 339	78.6
Madagascar	N/A	N/A	N/A	N/A
Nigeria	1 222	94.1	9 510	85.1
Ethiopia	582	79.7	4 061	80.5
D.R of Congo	1 834	87.2	2 324	78.2
Angola	1 297	57.1	1 751	94.7
Total	217 223	56.4	199 764	76.4

3. OTHER FIELD ACTIVITIES & SERVICES

3.1 CARE AND HOSPITAL SERVICES

384 projects in 50 countries reported 250 718 ex-patients on the care after cure register and 105 808 of these were said to be in need of protective footwear.

In 2003, 280 516 leprosy and non-leprosy patients were admitted and 62 946 surgeries were subsequently performed.

Table 7: Care and Hospitalisation activities

Services	Leprosy patients		Non- leprosy patients	
	Admissions	Surgeries	Admissions	Surgeries
Eye care	2 583	2 273	36 433	21 529
Reaction	6 659	1 539		
Ulcer	26 956	12 021		
Surgery	4 421	4 206		
Other	18 875	1 783	184 589	19 595
Total	59 494	21 822	221 022	41 124

3.2 SOCIO-ECONOMIC ACTIVITIES

In 2003, like last year the data for SER projects comes from the former ILEP B3 Questionnaires and the revised version which introduced a distinction between services for individuals and services for households. The data on the services to individuals in the table below combines the information in both kinds of questionnaire where this is compatible. The data on households only comes from the revised questionnaire.

In total, 297 ILEP projects in 44 countries reported the following SER activities:

Table 8: SER activities

- Projects services for individuals -

Services	Total number of clients	Leprosy patients	Females	Family members
Economic	34 523	10 645	5 982	17 896
Education	126 626	31 646	82 670	12 310
Psychological	20 836	8 477	7 356	5 003
Welfare	46 480	31 443	7 755	7 282
Total	228 465	82 211	103 763	42 491

- Projects services for households -

Services	Total number of households	Households with leprosy patient	Female-headed households
Housing	1 212	903	309
Welfare	7 278	1 624	5 654
Total	8 490	2 527	5 963

5. PROJECTS TOTALS

Page

TABLE D

MDT and Prevention of Disabilities by project	27
---	----

TABLE E

Care and Hospital services by project	49
---------------------------------------	----

TABLE F

(1) Socio-Economic activities by project - Services to individuals	69
(2) Socio-Economic activities by project - Services to households	81

This section lists all projects supported by ILEP Members in 2003 for which data was available. The data from some national programmes may include the data from other projects in the same country. For this reason, country totals do not appear on the following pages. For country totals, please refer to the preceding tables where overlapping data are excluded.

Table D: MDT AND PREVENTION OF DISABILITIES BY PROJECT - REPORTED IN 2003
